

## The St. John's and PEI Chapters of The Financial Management Institute Presents:

### Using Intelligent Automation Software in Business

On Thursday March 23, 2023, join Rob Ronberg from UiPath for a presentation on intelligent automation software. UiPath is a leader in intelligent automation software which is helping organizations overcome the limitations of disconnected systems that create undue manual work. .

In this session, attendees will establish a business understanding of intelligent automation and how it's being applied within finance to reduce mundane, repetitive tasks. Globally, finance is the largest area of adoption of intelligent automation as it helps reduce backlogs of work, improve service delivery and employee experience, while strengthening data quality and process standardization.

Rob has worked with UiPath for over 4+ years supporting the public sector in Canada and will provide a high level business overview of intelligent automation, show how it's being applied, and share some compelling examples and business outcomes followed by an open Q&A session.

The outline for this session includes (Newfoundland Standard Time):

9:00 – 9:10 Introductions - FMI

9:10 – 10:10 Presentation by Rob Ronberg

10:10 – 10:30 Questions and Answers

The registration deadline for this event is Friday March 17, 2023. **The session is free** and attendance will include 2022 – 2023 membership in the Financial Management Institute. **A link will be provided with your registration confirmation.**

**This session qualifies for 1.5 professional development hours.**
